

# Patio Comfort

## Portable Outdoor Table Top Patio Heater

When a full-sized “lifestyle” heater isn’t required, take a close look at the *Patio Comfort* Model PC-TT. This “mini” outdoor patio heater provides a 360 degree circle of radiant heat that will heat about a six to seven foot circle in minimal wind conditions.

Our PC-TT is perfect for smaller outdoor dining areas and patios, balconies, outdoor camping gatherings, dining at the beach or lakeside, under patios and awnings, where clearances are tight, or any outdoor area that may require localized warmth.

**Our PC-TT is designed for outdoor use only in well ventilated areas and should never be used indoors or in an enclosed area.**

The PC-TT is totally self-contained and portable and operates efficiently on a standard 16 ounce disposable cylinder (*not included*) and will operate between two and three hours depending on the output setting.

For your added safety all PC-TT heaters incorporate the latest in burner technology and safety systems. We included an (ODS) “oxygen depletion sensor” that will shut the unit off if there is inadequate oxygen in an area. We also include a “tilt” switch that will automatically shut the unit down in the event if should tilted over 30 degrees or knocked over. All *Patio Comfort* heaters include a “safety pilot” system that will stop the flow of gas if the burner should blow out. We go the extra steps for your family’s safety.

There’s no need to move the party indoors when the days or nights get a little chilly when you have access to a *Patio Comfort* table top.

Model PC-TT
