

# Model A242

## Portable Patio Heater

For Natural or Propane Gas

### THE SUNGLO™ A242 PATIO HEATER IS A WINNING COMBINATION OF NATURAL GAS AND PORTABILITY

The Sunglo™ A242 Freestanding Patio Heater offers the safety, convenience and economy of natural gas along with freestanding mobility. Without a bulky propane tank and cover, the Sunglo™ A242 design is sleek and slim, blending in with most any decor. The limited portability provided by the flexible hose attachment, allows greater flexibility in locating Sunglo™ A242 heaters around patio furniture, spas, and outdoor kitchens.

Each Sunglo™ heater casts a 12-15 foot diameter circle of sun-like radiant warmth outdoors.

#### Features:

- 50,000 BTUH on Natural Gas
- 100% safety shutoff
- CSA Design Certified
- Portable with heavy weighted base
- 1 year residential warranty  
(See local dealer for details)
- No Electrical Connections

# Model A242 Portable Patio Heater

For non-residential indoor or outdoor use  
For residential outdoor use

The Sunglo™ Model A242 offers the best of both worlds - the flexibility of a portable heater along with the safety, convenience and economy of natural gas.

The Model A242 has a sturdy steel base that provides this heater with stability as well as mobility. The top of the base is 16-gauge aluminized steel. Together with the powder coat (polyester) finish, this base is designed to last. An optional "tie down" kit is also available from the manufacturer at no charge.

When used with a certified natural gas flexible hose, the A242 heater can be easily moved from location to location. The A242 patio heater should always be turned "OFF" and allowed to cool down before moving. Installing multiple gas outlets around the patio will allow this heater to be used wherever it is needed.

Flexible certified gas hoses with quick-connect coupling suitable for the Model A242 heater are available from your local distributor. It is important that any hose be sized properly for both the gas input of the heater and length of hose. A longer hose requires a larger inside diameter to minimize pressure drop to the heater.

Each Model A242 heater is thoroughly tested at the factory before shipment. All Sunglo™ Patio Heaters are design certified by CSA International.
